

Durawall panels are a non permeable moisture and vapor barrier permanently installed to the foundation. Moisture entering the foundation is directed into any subfloor or surface drainage system, keeping the basement interior dry.

PHYSICAL PROPERTIES

	ASTM TEST	DURAWALL
Water Absorption	D-570	nil
Water Vapor Transmission	E-96	nil
Perm Rating	E-96	nil
Flexural Strength	D-790	1.03 psi

- Meets building code requirements
- Mold and mildew resistant
- Bright white finish
- Lifetime Warranty
