

Flexi-Seal is a reinforced flexible membrane that exceeds ASTM E-1745 standards for a vapor and moisture barrier.

Flexi-Seal is a critical component in constructing closed, conditioned or vented crawlspaces. Flexi-Seal exceeds all building code requirements for use in crawlspace encapsulation.

PHYSICAL PROPERTIES

	ASTM TEST	FLEXI-SEAL
Puncture Strength	D4833	39 lbf.
HydroStatic Resistance	D751	150 psi
Water Vapor Transmission	E96	.010g/100in ² /day
Perm Rating	E96	.022 US Perms

REINFORCED MOISTURE AND VAPOR BARRIER

Entire basements and crawlspaces can be completely sealed off from external moisture and ground vapor. Flexi-Seal transforms a dark dingy foundation into a clean, dry storage area that can be walked on:

- Stop Moisture Penetration
- Reinforced Heavy Gauge
- Brilliant White Finish
- Lifetime Warranty
