

The Inforcer Foundation System™ is a pre-engineered, effective and permanent solution that restores structural integrity to a foundation wall. The Inforcer's innovative adjustable design works in any installation scenario. Bowed, sheared and tipped walls can be quickly repaired and restored with just one product. No outdoor excavation is required for most repair jobs.

BEFORE

AFTER

The Inforcer Foundation System™ is affordable and can be installed in less than a day. Hydrostatic pressure, thermal expansion and contraction and shifting soil can damage any foundation. If the foundation is compromised, the entire structure is put at risk. Eliminate the risk and restore the strength of your foundation walls with Inforcer Foundation System™.
